INTRODUCTION

CANADIAN TRADE INDEX has been the authoritative guide to buying and selling in Canada for 91 years. It contains a comprehensive list of Canadian manufacturers having more than a local distribution for their products, irrespective of membership in The Canadian Manufacturers' Association. The INDEX is kept up-to-date by contact each year with listed companies who are asked to revise or confirm their listings. It is the foremost directory of its kind in Canada today. While great care is taken in compiling the listings, the publishers cannot assume liability for losses arising from any statements, errors or omissions.

HOW TO USE THE CANADIAN TRADE INDEX

Volume 1

1. Display Advertisers — pages prefixed A

Cross references to the display ads follow the companies' listings in Section B.

2. Classified List of Products — pages prefixed B

When you require a specific product, turn to this section where you will find in alphabetical order some 10,000 classifications of products made in Canada with the names and locations of companies making them. Frequent cross references will help you identify the product listing you want. Supplementing these lists are informative advertisements with additional information about a company's product. Those firms engaged in exporting are indicated by a star preceding their name. For further guidance on the use of this section see page B-2.

3. Trade Marks Section — pages prefixed C

When you know the trade name but not the name of the company manufacturing the product, consult this section. Then refer to Section F for full information about the company.

4. French Glossary of Product Headings — pages prefixed I

An alphabetical listing of products classified in Section B translated into French.

Volume 2

5. Export Section — pages prefixed D

If you want to contact a company engaged in exporting, look here for their telephone number, fax number, foreign representatives, contact names and geographical areas that these manufacturers are exporting to.

6. Distributor Section — pages prefixed E

7. Alphabetical List of Manufacturers — pages prefixed F

If you want to contact a company, look here for head office address, telephone number, branch and sales offices, names and titles of senior operating executives. Other data included — parent and subsidiary companies, principal products, brand names, export contacts, toll free number, fax, telex, annual sales, company size.

8. Geographical Section — pages prefixed G

If you are on the road and need to know what manufacturers are in the area, turn to this section where head office and plants of listed companies are arranged alphabetically by municipality, by province.

9. Product Headings — pages prefixed H

An alphabetical listing of products classified in Section B.
